

# Apache2 Basic Authentication

Quelle: <https://httpd.apache.org/docs/current/howto/auth.html>

Create user & password hash file with bcrypt encryption for passwords.

```
htpasswd -B -c /etc/apache2/.htpasswd demo-user New password: Re-type new password: Adding password for user demo-user </code> Add additional user to existing file.
```

```
htpasswd -B /etc/apache2/.htpasswd demo-user2
New password:
Re-type new password:
Adding password for user demo-user2
```

Enable Basic Authentication in Apache2 conf file.

[default.conf](#)

```
<Directory /var/www/html/example.org/>
  AuthType Basic
  AuthName "Basic Authentication"
  AuthUserFile /etc/apache2/.htpasswd
  Require valid-user
</Directory>
```
